

PÖLKKY

PANEL & FLOOR

Real wooden floor warms our feet

Wooden floorboards create a healthy and warm interior atmosphere. Over the years the floor will improve with age and have a patina. The product is eco-friendly and has great durability; later on the worn surface can have a light sanding and a new surface treatment, making it in a brand new condition again.

It is made from dense heart wood, specially dried and tongue and grooved on all four edges. POLKKYpanel & floorboards wear very well and are very durable, the surface quality is excellent. The tongue and grooved edged pine floorboards are suitable for both new and renovation building projects, the ready tongue and grooving makes for simple, quick and easy installation.

Standard products

- Specially dried 28 x 95 Prime
- 28 x 95 – sizes are available, suitable for leisure or free time buildings i.e.: cottage floor boarding (humidity 14 - 16 %). The product is tongue and grooved, but not specially dried: this must be taken into account when used.

Quality

PRIME: Best quality, mainly live knots. Individual, dark, intergrown knots may occur, some heart shakes are permitted.
ECO: Does not fulfil the surface quality requirements for PRIME.
Possibly requires some minor attention to the surface.

Length Products sold in falling 1,8 - 5,4 m or to lengths, for example 2,1 m.

Humidity Specially dried 8 %

Dressed

Technically made with a high level of workmanship and excellent surface quality. With the readymade tongue and grooves, laying the floor boards is made really easy. This reduces wastage and makes installation really simple. The machined grooves on the underside face ensure the plank stays within dimension stability and improves ventilation. On the edge of the board there is a small chamfer which helps with installation.
