Glued pillar EN 14080	90x90	A	● ●
	115x115	A	● ●

### Fixing and surface finishing

- use rust free fixings or fixings made from stainless steel (all fixing materials should be from the same material)
- the correct surface treatment increases the life time of the wood, it facilitates cleaning and helps prevent splintering
- surface treatment with tinted / non tinted wood oil, translucent / opaque wood preservative or exterior grade latex or oil-based paint (it is recommended that same surface
- treatment should be applied for future treatments) treatment should be carried out on a completely dry and clean surface
